

The Time Ship: A Chrononautical Journey (Early Classics of Science Fiction)

Enrique Gaspar

H. G. Wells wasn't the only nineteenth-century writer to dream of a time machine. The Spanish playwright Enrique Gaspar published *El anacronópete*—"He who flies against time"—eight years before Wells's influential work appeared. The novel begins at the 1878 Paris Exposition, where Dr. Don Sindulfo unveils his new invention—which looks like a giant sailing vessel. Soon the doctor embarks on a voyage back in time, accompanied by a motley crew of French prostitutes and Spanish soldiers. The purpose of his expedition is to track down the imprisoned wife of a third-century Chinese emperor, believed to possess the secret to immortality. A classic tale of obsession, high adventure, and star-crossed love, *The Time Ship* includes intricately drawn illustrations from the original 1887 edition, and a critical introduction that argues persuasively for *The Time Ship*'s historical importance to science fiction and world literature.
